

Case Studies

Jitendra Singh MD PC

Jitendra Singh MD PC moved his office to a location closer to Glens Falls Hospital. His phone system would require a complete rewiring which was estimated at over \$5,000.

We met with Dr. Singh and developed a plan to upgrade his phone system to a new VoIP system using the location's current wiring. We added a Meraki MX Router and firewall that load-balances his Fiber and High Speed Internet connections to guarantee VoIP quality of service while providing the fastest internet connections available to run his practice. We migrated the Practice infrastructure to the cloud including Email, EMR, Data, Billing and Phone services.

His first year's ROI or savings has been over \$10,000 and is expected to continue yearly.
